#Professional Experience

Six Trends / Full Stack Developer

August 15th, 2019 – Present : Toronto, Ontario

- ↳ Created a REST API in PHP to serve data to the IoT art piece, “Expiry Dates – Months” by Dennis Kavelman
- ↳ Developed a “Rescan” application in C++ for the “Expiry Dates – Days” scanning station to automate the restart process
- ↳ Developed a CMS using Node.js, MySQL and EJS to streamline the blogging process at Proudfoot
- ↳ Constantly maintaining, debugging and scaling existing applications with emphasis on organization and speed
- ↳ Working at a fast-paced startup to create full stack web applications using PHP, Node.js and MySQL

Toronto District School Board / Junior Programmer Analyst

November 1st, 2016 – September 30th, 2017 : Scarborough, Ontario

- ↳ Programmed and provided administrative support for the eForms application “Next Steps Employment Centres”, including form creation, installation, upgrading and debugging (SharePoint, InfoPath, C#)
- ↳ Developer on the School Library sites project using key web technologies, including HTML, CSS, JavaScript and .NET
- ↳ Assisted the lead systems analyst in SDLC management including testing, writing test scripts and documenting bugs
- ↳ Worked in a fast-paced team environment to meet multiple deadlines on concurrent projects
- ↳ Constantly communicated with front-end workers at the Next Steps Employment Centres and provided IT assistance

St. Jude’s Academy / IT Support Technician & Database Administrator

October 10th, 2016 - November 21st, 2016 : Mississauga, Ontario

- ↳ Provided IT assistance to staff at the school by responding to inquiries through both verbal and written communication
- ↳ Communicated between the database provider and client to bridge the gap between IT and business
- ↳ Maintained student database by adding/editing/deleting information and retrieved special information based on staff needs
